

COMPANY PRESS RELEASE

DR. ALF L. ANDREASSEN JOINS CLOUDSHIELD BOARD OF DIRECTORS

SUNNYVALE, Calif. — November 8, 2005 — CloudShield® Technologies, Inc., the leader in programmable deep packet inspection platforms for security, VoIP, and traffic management applications, today announced that Dr. Alf Andreassen, principal at Paladin Capital Group and co-founder of Paladin's Homeland Security Fund, has been named to the CloudShield board of directors and will serve as chairman.

"CloudShield is honored to have Dr. Andreassen serve on our board of directors. His extensive experience within the federal government and developing technology companies serving the public and private sectors, will prove a tremendous asset for the company" said Matt Jones, president and CEO of CloudShield. "CloudShield is continuing to partner with the federal government agencies to harden the nation's cyber defense, and Dr. Andreassen's knowledge and experience will help CloudShield further strengthen these partnerships."

"Networking is pervading every part of government operations, and securing the networks over which they operate has never been more important," said Dr. Andreassen. "CloudShield platforms offer compelling technical and economic benefits to government agencies, and I look forward to serving on the board of directors and helping the company expand its role in protecting the nation's networking infrastructures."

During his distinguished years of government service, his private career, and his service on corporate boards, Dr. Andreassen has concentrated on the realization of the potential of innovative technology and on the structural and managerial elements necessary to bring good ideas to practical applications. During the last ten years, he has served on the boards of directors of seven companies, almost all of which have involved high technology to advance security and provide other benefits to their customers. He was a founding member of AT&T Solutions, one of the fastest growing professional service organizations of its kind. From his role as Technical Advisor for Naval Warfare, his service with the Science Advisor to the President and with Bell Laboratories, Dr. Andreassen has been identified with promoting technological innovation in the area of national security.

Dr. Andreassen received his PhD in Physical Chemistry from Cornell University and completed a postdoctoral fellowship in Materials Science, also at Cornell.

About CloudShield

CloudShield is a provider of multi-gigabit, multi-function, programmable, deep packet inspection platforms targeted at large network operators. The company's unique capabilities allow existing content inspection, monitoring, and security applications to be performed at true gigabit speeds on even small packet sizes, and enables entirely new classes of applications and revenue generating services. The CloudShield platform can inspect, process, and modify packets at multi-gigabit speeds without introducing noticeable latency. Through its application partners, CloudShield has helped deliver solutions to carriers in North America, Europe and Asia as well as several important federal government customers. More information about CloudShield can be found at www.cloudshield.com.
