

COMPANY PRESS RELEASE

CLOUDSHIELD® NAMES NEW VICE PRESIDENT OF SALES

Former Sun Microsystems Executive to Drive Worldwide Commercial Sales Efforts

SUNNYVALE, Calif. — February 1, 2005 — CloudShield® Technologies, Inc., the leader in high performance deep packet processing platforms for network security and content analysis applications, today announced the appointment of Sherle Webb as Vice President of Commercial Sales, reporting to CEO Rusty Cumpston.

Ms. Webb brings more than 20 years of experience in enterprise sales, with an extensive background in deploying and managing new sales organizations. In this new role, she will have global responsibility for driving CloudShield's commercial sales efforts, with an immediate emphasis on revenue growth and global deployment of direct and indirect sales strategies targeting service providers and Fortune 500 enterprise businesses.

“Sherle is a great addition to our team,” said Cumpston. “Her proven track record, her experience in both direct and indirect channels, and her commitment to driving customer satisfaction and loyalty, make her an ideal fit for CloudShield. I am confident that Sherle's experience and leadership skills will enable us to achieve significant growth in the commercial market, and we are very pleased that she is a part of our team.”

“The demand for flexible solutions that address content security and traffic management issues is growing quickly and CloudShield has positioned itself at the forefront of this emerging market with their unique and proven solution,” said Webb. “CloudShield is poised for significant growth, and I am very pleased to have joined the company at such an exciting time.”

Previously, Ms. Webb held senior sales management positions at Sun Microsystems, including Vice President of Global Partner Sales, Vice President of the U.S. commercial systems integrator and independent software vendor sales area and Vice President of Worldwide Application Provider Sales. She has also held sales positions at Apollo Computers and Data General Corporation. She holds a B.S. in Computer Science from Texas A&M University.

About CloudShield

CloudShield Technologies provides high performance open platforms for network security and content analysis applications and services. With CloudShield, end-users and network integrators can rapidly develop and deploy networking solutions leveraging CloudShield's deep packet inspection technology, for complete traffic visibility and control in high-speed, high-volume networks. More information about CloudShield can be found at www.cloudshield.com.
