CloudShield Technologies Appoints Vice President of Engineering

Product development veteran hired to lead technology innovation

SUNNYVALE, Calif., October 27, 2008 – [CloudShield](#) Technologies, Inc., a leading provider of service management and infrastructure security solutions, today announced it has selected Kenneth McKeithan as vice president of engineering. Kenneth will be responsible for all hardware, software and application development for CloudShield and will report directly to president and CEO Matt Jones.

“Ken has an outstanding level of experience and achievement when it comes to leading a product development team and creating carrier class applications,” said Jones. “As CloudShield continues to expand our reach within tier 1 service providers and national governments, we will rely on Ken to lead the technological push. His experience at Atheros Communications working with major names like Fujitsu, HP and Apple will help us secure new partnerships and continue our success.”

CloudShield is a private company that sells to the world’s largest network service providers and national governments through its partners, including: Alcatel Lucent, IBM, L-3 Communications and Northrop Grumman. CloudShield’s unique high speed network platform provides unmatched capabilities in the areas of network security, cross domain solutions, content management and network policy enforcement functions.

“Telcos and large service providers are constantly on the lookout for the next major developments for their network architectures,” said Kenneth McKeithan, vice president of engineering at CloudShield. “Cloudshield is already taking steps towards offering open, flexible, multi-function networking platforms that give ISPs the scalability they demand. In my role at CloudShield, I look forward to continuing the strong innovation the company has set forth in terms of product development and creating solutions that bring network security and management to the next level.”

Kenneth is a senior-level executive with over 25 years’ experience in software architecture and product development. Prior to joining CloudShield, he was the vice president of software engineering at Atheros Communications, a leading wireless solutions provider to OEM, ODM and several major enterprises. While senior vice president of engineering at startup Allocity, Kenneth led a team that provided storage and storage management for Microsoft Exchange products to a number of enterprise and small business customers. When Allocity was acquired by EMC Corporation in 2004, Kenneth became its chief technology director overseeing SOHO solutions. He has also held senior management positions at VERITAS Software and Amdahl Corporation.
