**CloudShield Expands Business with New Office**  
***Success in Federal Government sector drives growth***

**SUNNYVALE, Calif. & HERNDON, VA – July 23, 2008 – [CloudShield](#)**

Technologies, Inc., today announced the opening of its new office location in Herndon, VA. The expansion comes as a result of doubling annual revenue during each of the past three years and tripling the size of the team to address expanding Federal business opportunities. Staffed with seasoned sales, engineering and professional services experts, the team is helping different government agencies tackle their toughest security and network policy enforcement challenges.

Bruce Gilley, Vice President of Federal Operations, leads CloudShield's Virginia office. "Our success in the Federal market has been based on complementing CloudShield's advanced Deep Packet Inspection (DPI) platform with experienced, mission savvy personnel to deliver solutions that enable our customers to dynamically modernize, manage and protect their mission critical networks," said Gilley.

Through CloudShield's Federal Team, the company has successfully supplied its security and adaptive policy enforcement platform to numerous DoD and intelligence agencies. CloudShield's unique high speed DPI network platform provides unmatched capabilities in the areas of network security, cross domain solutions, content management and network policy enforcement functions.

"Technologies like DPI and directly relevant operational policy controls are critical in protecting and advancing the government's networked infrastructure," added Gilley.

“We have proven technology and critical operational experience required to meet the specific needs of any government organization,” said Matt Jones, CEO at CloudShield. “Our Federal Government practice and our partner network are well versed in understanding an organization’s goals and delivering solutions to achieve them.”

CloudShield’s Federal Team combines unique, best in class platform and applications knowledge with more than 100 years of combined DOD, intelligence community and federal agency operational experience. The company is committed to supporting the U.S. government’s mandate to improve the protection of the critical infrastructure and drive up efficiency across network command and control.
